Spring Flowers are Planted in the Fall

ARCHIAS' SEED STORE from the beginning have made a point of supplying the best bulbs, seeds and plants that it is possible to produce, and this policy has given Archias a standing with the trade of which we are justly proud. In offering the following list of stock for fall planting we do so with the assurance that everything in it is of tried and proven merit and we have the fullest confidence that our customers will be satisfied.

Remember that in order to have these spring flowers it is necessary to plant the bulbs this fall, and we advise that you place your order for them at once. Below we give a great deal of valuable information about the planting and handling of bulbs, and if these instructions are closely followed success is certain.

Indoor Culture

Bulbs intended for blooming during the winter can be planted in pots, pans or boxes, and left in the open air, covered with a few inches of ashes or soil, until the earth begins to freeze, and then placed in a cool greenhouse, cellar or room, at a temperature of 50 degrees. They will need, occasionally, moderate watering after they are brought inside. Or the pots, pans or boxes may be placed at once, after potting, in a cool, dark cellar, watering well and cover the same as above. The whole success of pot culture depends upon getting the roots well established in the pots, at a low temperature of say 40 or 50 degrees, before you begin to force the tops at 60 degrees or over. After this the bloom is easily developed by giving light and water; and one can have a supply of flowers from Christmas until after Easter by regulating the time of bringing them to the light.

A leaflet giving full cultural instructions on planting and care of bulbs mailed free to customers who ask for it when ordering.

Outdoor Culture

Apply well-rotted cow or sheep manure or bone meal; fresh manure is injurious to bulbs. The soil should be well drained. A small quantity of crushed limestone or coal ashes at the base of each bulb when planted in stiff soil will be beneficial. In planting, the bulbs should be placed from an inch to four inches below the surface, according to the size of the bulb. Cover the bulbs with soil one and one-half times their own depth. When the ground freezes the bed should be covered with two to three inches of stable bedding or litter, to be removed in early spring. Too early and heavy covering starts the tops prematurely.

Rock Garden Planting.

Six Grand Single Early Tulips

This class gives us the first bright flowers in spring, usually blooming about the middle of April to the first of May. The uniformity of their height and their upright short stems make them very desirable for planting in beds, parkways and similar locations. They are particularly good for forcing and pot culture, blooming very early and of dwarf habit.

ARTUS. Bright scarlet, good forcer and bedder. Height 14 inches. 65c per doz.; \$4.50 per 100.

YELLOW PRINCE. Golden yellow; one of the best yellows for forcing. Height 13 inches. 85c per doz.; \$6.50 per 100.

Archias' Special Mixture of Early Flowering Single Early Tulips

ARCHIAS' SPECIAL MIXTURE. Made up from named sorts, proper proportions of bright colors, all blooming together and of uniform height; extra fine bulbs. 60c per doz.; \$4.00 per 100, postpaid.

Rembrandt Tulips

An attractive class of late-flowering Tulips similar to the Darwins in season and habit, but distinct from that type in color and marking. A variety that will become very popular when better known. The blooms are either striped, feathered or blotched. Same culture as the Darwins.

MIXED REMBRANDT TULIPS. A splendid mixture of all colors. 75c per doz.; \$5.00 per 100.

Majestic Breeder Tulips

The Darwin's greatest rival. As tall and stately as that superb variety, and the most popular of all late Tulips today.

Their wonderful color combinations in harmonious blendings of purple and bronze, yellow and bronze, gray and lilac, old-gold and maroon, and buff tones, justly reward the admiration of every flower lover. While they are late to bloom, they surpass the Darwins in size and brilliancy of color. The flowers are excellent for cutting, many of them are elegantly sweet scented.

BRONZE QUEEN. Large, strong flower, purplish fawn, interior buff yellow, bright lemon-chrome base. Height 24 inches. 65c per doz.; \$4.50 per 100.

CARDINAL MANNING. Dark rosy violet, changing to an almost pure orange at the extreme edges of the petals. Height 28 inches. 85c per doz.; \$6.00 per 100.

LORD BYRON. Very large perfect flower of rich purplish red. Height 20 inches. 85c per doz.; \$6.00 per 100.

MARIE LOUISE. Old rose, flushed orange-salmon, edged bronzy orange; olive base. Height 23 inches. 80c per doz.; \$5.75 per 100.

YELLOW PERFECTION. Light bronze yellow, edged golden. Height 24 inches. 85c per doz.; \$6.00 per 100.

MIXED BREEDER TULIPS. Made up from above named varieties. 70c per doz.; \$5.00 per 100.

Mammoth Named Crocus

These are larger and stronger bulbs than the mixtures and produce correspondingly finer flowers.

PRINCE ALBERT. Dark blue. 40c per doz.; \$3.00 per 100, postpaid.

CLOTH OF GOLD. Gold striped. 50c per doz.; \$4.00 per 100, postpaid.

Archias' Superfine Bedding Hyacinths

These are selected named sorts, grown in Holland, best adapted for beds and borders in the garden or for florists' greenhouse forcing for cut flowers and are of such superior quality as to be used in immense quantities for both purposes. Especially desirable where a grand display is desired at a low cost. If you wish bulbs for house culture and pots, we would strongly advise you to use the named sorts as the individual spikes will be larger and more perfect.

Dutch Miniature Hyacinths for Forcing

This superb form of Hyacinth has been neglected for a long time, because their beauty and ease of culture as pot plants is not generally known. They are, as the name implies, miniatures of the large exhibition sorts with spikes 3 to 5 inches long and nicely formed. A 7- or 8-inch pot with 9 or 10 of these bulbs in full bloom is indeed a thing of beauty. Plant same as the exhibition sorts, set away in a cool dark place for about 14 weeks and bring into bloom in a cool room. The following sorts have proven best in our trials.

Archias' Elegant Hardy Lilies

The Queen of Flowers

Nothing can surpass the Lily in beauty, purity, delicacy and stately grandeur. They thrive best in well-drained, sandy loam made rich with thoroughly rotted cow manure. Your garden is not complete without a collection of Lilies. They are all hardy and will stand our most severe Winters. Lilies should be planted in the Fall when possible, as they give much better satisfaction. The Harris and Longiflorum are planted in pots for blooming at Easter, the other varieties are all hardy.

CHINESE REGAL LILY (*L. Myriophyllum*). This beautiful new Lily comes from Northwestern China, which is a guarantee of its hardiness. "One of the most beautiful of all known Lilies." The exquisite blending of tints and colors forms a charming contrast with the rich, deep green foliage. Highly recommended for general culture. The large trumpet-shaped, fragrant flowers are pure, transparent white, with a distinct, rich, canary-yellow throat and orange stamens. The buds and outside of petals are delicate pink, which is often reflected through the petals. Height 3 to 4 feet; mature bulbs producing 5 to 10 flowers in June and July. These bulbs are not so large as other Lilies. Blooming bulbs, each, 35c; 3 for \$1.00; 12 for \$3.00.

Latham Raspberry

(Minnesota No. 4)

Yields Twice as Much as Other Red Raspberries.

Here is a new red Raspberry that was originated in Minnesota and acclaimed for its hardiness in that state. During the past few years its merits have spread with its planting throughout the middle and eastern states. The high yielding ability of the Latham is due largely to its resistance to Mosaic and other red Raspberry diseases; wherever tried, reports have been most favorable. It possesses the hardiness of "King" and produces very strong, vigorous, thornless canes; very productive. Berries are large, of highest quality, ripen evenly and hold up well throughout the season. The canes do not need covering even in severe locations. We have a fine stock of this splendid new variety and hope you will give it a thorough trial, as we are sure it will prove a money-maker for you, especially in a season when other standard varieties freeze out. 12 for \$1.00; 25 for \$1.65; 100 for \$4.50, postpaid.

Archias' Delicious Table Grapes

Every home should have a dozen or more Grape vines planted on an arbor or along the garden fence. They are delicious to eat fresh from the vines; can be made into the most health producing grape juice; and jelly—well who doesn't like Grape jelly? Once planted the Grape vines will continue to yield for years with practically no special attention. Our Grapes are strong, well rooted plants that are sure to grow for you.

Worden (Blue)

A valuable blue Grape ripening from three days to a week before Concord. Berry large, of good quality; thin skin; very productive; vine a strong grower. The most popular blue Grape grown today. It comes in early enough to avoid the rush of Concord, thus brings from one to three cents per pound more.

Moore's Early (Blue)

A large blue Grape, ripening a week earlier than Concord; good grower; berries large, good quality, and makes a moderate yield; very valuable as an early Grape.

Niagara (White)

The most popular white Grape in existence. Fruit large and very productive; a good grower; ripening same season as Concord; equally good; valuable in every way.

Brighton (Red)

One of the best red Grapes in cultivation. Bunch large and compact; a strong grower and very productive; quality good.

Agawam (Deep Red)

Deep red, large bunch, berries large, meaty, with rich, aromatic flavor. Ripens a little after Concord.

Concord (Black)

An old variety; does well wherever planted; good size; productive.

Moore's Diamond (White)

The color is a delicate greenish white, with a rich yellow tinge when ripe. Very few seeds, juicy, and almost transparent. Berry size of Concord and two weeks earlier.

Directions for Planting Strawberries

For small gardens, plant 12 x 30 inches apart. For field culture, plant 1½ x 3 feet, requiring 8,000 plants per acre. Well drained, rich soil. Fertilize with Vigoro or Vegetable Special Fertilizer. Do not use stable manure as it will attract grubs and cut worms. Mulch in fall.

Archias' Flower Seed for Fall Planting

Seeds of Hardy Perennials may be sown any time during the summer or early fall in the garden or cold frame to produce plants that will flower the next season, and continue to bloom each succeeding year. Transplant before frost where intended to remain. During the winter it will prove beneficial to the plants if a covering of loose litter or straw is provided. A hardy bed or border, when once established, requires practically no attention and will, if varieties have been properly selected, provide an abundance of flowers from early spring until frost.
